Skills/Software

4 years of active development with **C#** and **Unity**, going from tool development to gameplay programming to shader-development.

An internship in **Unreal Engine** and **C++** improving my fundamentals from the studies.

I'm an **endlessly enthusiastic team player**, who always strives for **clear** and **open communication**.

Education

Bachelor digital arts and entertainment

Howest
2017 - 2021

Languages

Dutch Native

English Fluent

French Basic

A gameplay programmer specialized in Unity Development with experience in multiplayer networking, performance-first development practices, and third-party software implementation e.g. : development for the PSVR2.

I excel in close-knit teams, and strive to push my own and others' skills forward through close collaboration and knowledge sharing

WORK EXPERIENCE

Sep 2021 – Present

Triangle Factory, Gent (BE).

Game developer

- Active development in 2 live-service shooters: Breachers and Forefront.
- Developing in Unity first with OOP and then an in-house variant of an ECS.
- Multiplayer networking for 32-players.
- Implementing gameplay systems e.g. voicechat.
- Optimizing and bug-fixing to ensure the product quality.
- Porting the game to a wide variety of VR platforms.
- Performing code reviews.
- Active post-launch support keeping third-party software up to date.

Feb 2021 – Sep 2021

OneBonsai, Vilvoorde (BE).

Junior Gameplay Programmer Internship

- Developed modular functionality to be used throughout different trainings.
- Networking through built-in Unreal functionality.
- Developing of in-house blueprint nodes.
- Designing goal-oriented trainings in VR.
