English C1

Education

Bachelor digital arts and entertainment

Howest
2017 - 2021

A senior gameplay programmer specialized in Unity Development with experience in multiplayer networking, performance-first development practices, and third-party software implementation e.g. development for the PSVR2.

I excel in close-knit teams, and strive to push my own and others' skills forward through close collaboration and knowledge sharing.

WORK EXPERIENCE

Feb 2026 – Present

Pamogj, Brugge (BE)

Lead Developer

- Developed the mixed reality "Rise Of" from a base idea into a commercially sold product, garnering great reviews from customers and being responsible for the entire production pipeline.
- Main point of contact for both internal and external stakeholders regarding the technical state of the product.
- Provided direction and mentorship to the development team.

Sep 2021 – Feb 2026

Triangle Factory, Gent (BE)

Game developer

- Development in 2 live-service shooters: Breachers and Forefront.
- Developing in Unity first with OOP and then an in-house variant of ECS.
- Multiplayer networking for 32-player lobbies/sessions.
- Implementing gameplay systems e.g. voicechat.
- Optimizing and bug-fixing to ensure the product quality.
- Porting the game to a wide variety of VR platforms.
- Performing code reviews.
- Active post-launch support keeping third-party software up to date.

Feb 2021 – Sep 2021

OneBonsai, Vilvoorde (BE)

Junior Gameplay Programmer Internship

- Developed modular functionality to be used throughout different trainings.
- Networking through built-in Unreal functionality.
- Developing of in-house blueprint nodes.
- Designing goal-oriented trainings in VR.
